

The Race Division, under the personal direction of Trevor Humphrey, has an established pool of engineering, technical and administrative personnel, drawing together experience and skills from all levels and disciplines of Motorsport.

Successes include race wins in the VW Racing Cup and class wins in the Britcar 24Hours, both managing colleague teams and in the teams own right.

The principal focus of the division is our BTCC programme and associated projects, however selected Britcar Dunlop Production GTN Championship and Dunlop Production Touring Car Trophy rounds are also taken in.

To move the BTCC Team around the country we use a purpose built, 2-car, 40 foot trailer and tractor unit, a smaller rigid truck and a LWB van with towing capabilities.

We are also able to offer the following services to others on an ad hoc basis:-

- Race and rally team management.
- Race and rally car, design, build, fabrication, refurbishment and preparation.
- Engine and gearbox build, rebuild and component machining.
- Driver management.
- Professional driver tuition.

Should you wish to enquire about any of the services our Race Division is able to supply, please contact Trevor Humphrey by telephone on +44(0) 1923 237444 or email.
